

BOATEYE360

C-1080

FULL COLOR NIGHT VISION BOAT CAMERA

See Clearly. Navigate Safely. Even in Near-Total Darkness.

The BoatEye360 C-1080 lets you see at night the way you see by day. An advanced CMOS sensor captures true full-color images in near-total darkness — crab traps, buoys, bridge pilings, kayakers and other vessels stay visible under starlight, moonlight or dim dock lighting.

Full color in
near-total darkness

1080p

HDMI + RCA

Dual output included
at no extra cost

316L

STAINLESS STEEL

Titanium screws,
IP68–IP69 rated

Available in white, black and blue marine-grade housings.

60-day money-back guarantee · 1-year warranty · U.S.-based support

WHY BOATERS CHOOSE THE C-1080

● Full color, not gray

Unlike thermal or monochrome night vision, the C-1080 shows what an object actually is — color, shape and detail.

● Works with your chartplotter

HDMI and analog RCA are both included. Compatible with Garmin, Simrad and most MFDs with a video input.

● Mounts either way up

Install upright or inverted — just flip the U-bracket. T-tops, dashes and bow mounts.

● An industry first: 1080p HDMI

The first marine night vision camera with true 1080p HDMI output. Options up to 4K at 60fps.

● Built to outlast the boat

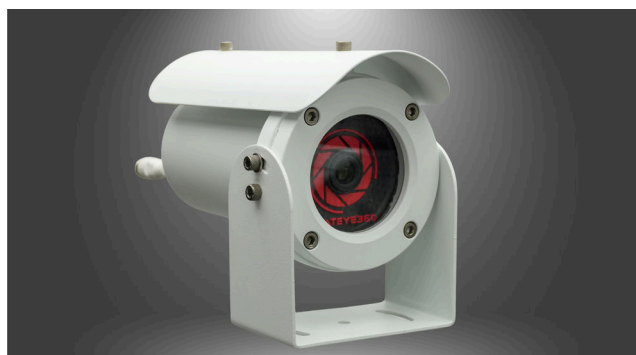

316L marine-grade stainless steel with titanium screws. IP68–IP69 rated for long-term saltwater exposure.

● Simple 12V wiring

Standard 12V @ 2A. Wire to your nav lights or a switch. 33 ft power/RCA cable included.

SPECIFICATIONS
